Default IPv4 and IPv6 Unicast EBGP Route Propagation Behavior Without Policies

`draft-ietf-grow-bgp-reject-02`

NTT {Mauch, Snijders}, Nokia {Hankins}

The "BGP Reject" draft in a nutshell:

There is one outstanding question:

Should BGP Reject **ONLY** apply on AFI/SAFI "IPv4 Unicast" and "IPv6 Unicast"? (as in -02)

OR

Should BGP Reject apply to any AFI/SAFI? (as in -01)
